PURENIQUE™
HYGIENE SOLUTIONS

Stay Strong Together™

At Purenique, we are responding to the immediate need to provide our medical and front line workers with protective masks so they do not contract COVID - 19.

We have hand picked and carefully vetted seven FDA and CE Certified manufacturing facilities that have the capacity to produce up to one million N95, KN95, and disposable surgical masks per day.

We offer a competitive advantage with our high quality materials and expedited worldwide shipping.

Purenique believes that by providing our front line workers, nurses, doctors, ambulance drivers, and all essential personnel with PPE that we are saving lives and containing the virus.

We are front line responders and believe that we are stronger together.

Why Purenique Solutions ?

- We provide high quality, FDA/CE/NIOSH certified protective masks to medical workers and civilians to protect them from being exposed to harmful pathogens that cause COVID-19.
- We are not simply an intermediary, we have strong relationships and agreements with the most highly regarded manufacturing facilities that produce FDA and CE certified N95, KN95 respirators, and disposable surgical masks.
- We work with the most prestigious and reputable logistics company to ensure that your order arrives on time and is 100% insured.
- We have complete transparency and visibility into the cost of materials. While demand has increased since the outbreak of COVID-19, our prices are always fair and in line to the market value. No price gouging or inflated pricing.

Mask Guide & Best Practices

**N95 NIOSH Certified Respirators
DTC 3X**

**KN95 NIOSH FDA/CE Certified
Respirators KZ 017**

**General Public Lifestyle Mask
YND 188**

Certification:

N95, NIOSH Certified

KN95, FDA or CE Certified

Respiratory Protective Mask, FDA or CE Certified

Who should wear this?

This is the most common and effective surgical/medical grade facial respirator intended for doctor and hospital employees who are treating COVID-19 patients.

All essential employees, front line workers, or business professionals working in a shared space.

Any essential worker: police officer, grocery store worker, nursing staff, all business and office employees, and any medical professional interfacing with patients not at high risk for COVID-19.

What is the correct fit on the face?

Correct fit is tightly on face, foam insert on the nose bridge should wrap tightly around the nose to prevent any particles from entering.

Correct fit is tightly on face, foam insert on the nose bridge should wrap tightly around the nose to prevent any particles from entering.

Correct fit is loosely on face, while still covering and protecting the nose and mouth.

Filtration Properties:

Filters a minimum of 95% of harmful air borne particles and pathogens, prevents the user from breathing in any COVID -19 droplets suspended in the air.

Filters a minimum of 95% of harmful air borne particles and pathogens, prevents the user from breathing in any COVID -19 droplets suspended in the air.

Protects against large airborne droplets but not the smaller particles that an N95/KN95 has the ability to block. These masks still offer better protection than a cotton cloth.

Other tips?

Wash hands before and after use, and always avoid touching the front of the respirator during use.

Wash hands before and after use, and always avoid touching the front of the respirator during use.

Wash hands before and after use, and always avoid touching the front of the face mask during use.

Should my children wear a mask?

Yes, children should wear masks in public areas and Silver Lining Solutions sells children's masks.

Other occasions for use:

Any hospital or medical office where your exposure to harmful particles exists.

Riding the subway, traveling on a plane, entering a hospital or any testing site where exposure to COVID -19 exists.

Everyday activities such as going to the grocery store, dropping off any mail to USPS, exercising outside, and pumping gas. Suitable for office and professional settings.

Do I wear this if I'm social distancing?

Yes, some droplets or air borne particles can travel up to 20 meters, wearing a protective respirator is the only way to stay safe against the virus.

Yes, some droplets or air borne particles can travel up to 20 meters, wearing a protective respirator is the only way to stay safe against the virus.

Yes, some droplets or air borne particles can travel up to 20 meters, wearing a protective mask is the only way to stay safe against the virus.

How long can I wear this in a hospital or medical setting?

Dispose of after each patient encounter, or if the respirator becomes wet or does not fit tightly to your face. General recommended use is for 8 hours.

These are single use masks and should be disposed of after each use. Appropriate in any non surgical medical situation and can be used between 4 - 8 hours.

These are single use masks and should be disposed of after each use. Appropriate in any non surgical medical situation and can be used between 4 - 8 hours.

N95 NIOSH & CE Certified Respirator

Stay Strong Together™

“Connecting FDA and CE certified supply manufacturers of respirators with governments, institutions, hospitals, first responders, and essential employees.”

- **Description:** NIOSH and CE certified butterfly shape respirator with proper seal ensures that at least 95% of particles, bacteria, and non oil dust that are .3 microns or larger are filtered (an average human hair is 70 -100 microns wide). Easy to use, comfortable, and hygienic. (DTC3X FFP3 NR filters at least 99% of particles, image shown in red). (Surgical grade also available.)
- **Features & Fit:** Respirator features a headband design style, and a folding shape for easy fit around the face. Ultrasonic welding technology has been applied so this respirator is completely glue-free and odorless.
- **Performance Standards:** NIOSH Certified and listed with the CDC. ISO certifications located on page 13 in first link.
- **Manufacturer Model No:** DTC3X
- **Product No :** KZ001-DTC3X-95FOLD
- **Product Offerings:** 20 respirators per box, 20 boxes per carton measuring 62 x 29 x 34 cm.
- **Approximate Allocation:** 300,000 per day, contact us for minimum order and delivery.
